

SHOPFITTERS

Longspan Racking System

As well as shop fittings, we also stock and supply industrial warehouse racking. The medium duty racking below is ideal for stock room storage, and like our shop shelving, they are modular systems which means you can choose the combination of components that best suits your requirements.

Versatile and easy to assemble

Frames and beams simply slot together using the unique two-locator angled system, that increases in security the greater the weight added. Fully adjustable for height, the system is suitable for goods of all shaped and sizes.

Illustrated Example:

Height: 2000mm
Length: 3 x 1840mm bays
Depth: 600mm

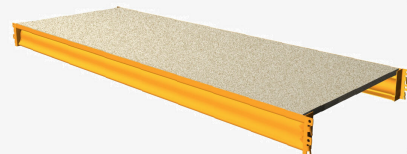

To price this illustration:

There are four frames and nine shelf sections, the price for this would be:
4 x £28.76 = £115.04 (Frames)
9 x £34.50 = £310.50 (Beams with Board)
Total = £425.54
